

Easy and secure application access from anywhere

Citrix Access Gateway is the best secure access solution for the Citrix Delivery Center™

- **Leader:** Gartner Magic Quadrant for SSL VPN
- **SmartAccess:** Adaptive and highly granular scenario-based controls over access and actions
- World-class scalability and performance

Citrix® Access Gateway™ is a secure application access solution that provides administrators granular application-level policy and action controls to secure access to applications and data while allowing users to work from anywhere. It gives IT administrators a single point of control, and tools to help ensure compliance with regulations and the highest levels of information security across and outside the enterprise. At the same time, it empowers users with a single point of access—optimized for roles, devices and networks—to the enterprise applications and data they need. This unique combination of capabilities helps maximize the productivity of today's mobile workforce.

Access Gateway Editions

Citrix Access Gateway is available in three editions:

Enterprise Edition

The best secure access solution for enterprise environments, offering market-leading scalability and performance, highly sophisticated SmartAccess policy capabilities, browser-only access, high-availability options and integrated application acceleration and optimization.

Advanced Edition

Designed for organizations with fewer than 500 concurrent users who are looking for an excellent secure remote access solution that includes highly sophisticated SmartAccess policy capabilities, browser-only access or mobile device support.

Standard Edition

Designed for organizations with fewer than 500 concurrent users who are looking for an excellent, cost effective secure remote access solution without the need for highly sophisticated policy deployment.

Features by edition

Feature	Standard Edition	Advanced Edition	Enterprise Edition
Easy application and desktop access			
Single point of access	•	•	•
Full access to all applications	•	•	•
Tight integration with Citrix® XenApp™ and Citrix® XenDesktop™	•	•	•
Browser-only access		•	•
Flexible endpoint security policies and analysis			
Integrated endpoint scanning	•	•	•
Enhanced machine identity scans	•	•	•
Quarantine groups and remediation			•
Extensible endpoint analysis		•	
Scenario-based policy control			
Adaptive access control		•	•
Adaptive application and action control		•	•
Adaptive session policies		•	•
Application and data security			
Standards-based security	•	•	•
Extensive authentication support	•	•	•
Cascading authentication			•
Client certificate support	•	•	•
Basic split tunneling control	•	•	•
Enhanced split tunneling control			•
Browser cache cleanup			•
Turbocharged secure access			
Interoperability between Access Gateway and Citrix Repeater™ Plug-in	•	•	•
Business continuity			
High availability configuration			•
Optional global server load balancing (GSLB) – powered by Citrix® NetScaler®			•
Simplified administration			
Centralized administration	•	•	•
Wizard-driven configuration	•	•	•
Multiple virtual VPN servers			•
Historical charting			•
Administrative auditing			•
Auto-downloading and auto-updating client plug-in	•	•	•
